# Health Check

For the design phase of your project

Do you want to avoid surprises in your project, but you are not sure if the design is on track?

We analyze the quality of your design process and check proactively if your project is really on track. This means that you can easily obtain a meaningful and independent third party assessment of the design process.

1	**2**	**3**
Complete a short survey	AppEx analyzes your design process	We provide you with an analysis and recommendations

Course of Action

1. We complete a succinct survey in collaboration with design team.
2. We analyze the project based on a proven process model, using our AppEx knowledge management software.
3. We provide you with a Health Check which offers you an independent assessment of the project status and a quality assurance report.

Advantages

- Avoidance of surprises, which result in cost increases and delays.
- Quick and easy: we provide you with a project analysis within three days of completing the survey.
- Third party assessment of your design process to prevent bad decisions and surprises. This assessment is based on the analysis of over 100 projects.
- Recommendations for process improvements.
- The Health Check allows you to have meaningful discussions with the project team about the status of the project.
- No software or software licenses required.

Additional Services

- Project analysis with the AppEx-Software. Review of the decisions and the required documents and products. Check if these products are coordinated between the different design disciplines and if they were developed in the appropriate sequence.
- Reports with analyses and recommendations for the following design phases:
  - Project definition phase: are the requirements and goals of the owner clearly defined?
  - Concept phase: Are the design requirements clearly defined?
  - Design coordination: Is the design coordinated?
- Additional interviews with the project team or detailed analyses of all design disciplines. We will provide recommendations and potential implementation steps.
